Dabiola®
“Our flavor, your delight”

Dabiola® is the brand that identifies our dehydrated fruits, nuts and our selection of herbal teas. Distinctive and authentic products based on the highest quality standards.

WE ARE SPECIALISTS IN DEHYDRATED FRUIT, IMPORTERS AND EXCLUSIVE DISTRIBUTORS OF THE LARGEST PLANTATION OF MANGO IN THE WORLD, REGISTERED INTO THE GUINNESS BOOK OF RECORDS.

**In December 2019, our plantation
won the Guinness book of records for:
“The world’s largest mango
plantation”.**

**With an area of 6.43 square miles, an altitude above 5794 ft and
with an average of 2,541 hours of sunlight per year.**

“Our quality is the result of our effort and dedication”

Since the 1990s, our cooperative insisted on organic production, without sulfites, without pesticides and chemical fertilizers. **And this commitment has been recognized by the European Union** for agricultural production, which guarantees the safe and sustainable production of food, GAP (Good Agricultural Practice).

Our production process does not use pesticides or chemical fertilizers and growth regulators. Preservatives accepted by the European Union are used, which act as preservatives to prevent the growth of microorganisms, discoloration and oxidation.

It is a safe and respectful fruit with the environment, nutritious and of high quality.

Dabiola

Privileged situation

The geography, the climate and the environment combine in a fertile soil that produces excellent quality fruit.

Unique natural conditions make our mango have distinctive characteristics. Its main characteristic is late maturity, due to the geographic location and the altitude. The same variety of mango in other areas of Southeast Asia ripens 4-5 months earlier than ours.

Its flavor, the high content of nutrients of the same variety is 1.2% - 2.5% higher, than that of other mangoes produced in Asia. Dabiola mangoes due to the extra sunlight they have during the growing season acquire a very intense and bright color.

Our agricultural cooperative

Annual Production: 120.000 tons

Our cooperative is committed to the environment. We are conscious of taking care of our land and our people. We contribute to the development of the rural area where different ethnic minorities coexist.

Ready to go!

Mango can be used in a wide variety of hot and cold , sweet or savory dishes. It can be included in many recipes, whether in salads, meat roasts, desserts, etc. It can be used to make juices, smoothies, jams and compotes.

- Healthy snack
- Bake with dried fruit
- In trail mixes and cereals
- Granola mix
- Liquid sweetener
- Added to your fruit and Veggie salad
- Mix with a cheese platter
- Sweet side dishes
- In savory dishes and salads
- Stewed fruit

Another healthy way to snack between meals.

A piece of 100% natural fruit for breakfast, lunch, or dessert.
